FEEDING DIRECTIONS: Schulte Show Beef Starter/Grower is designed for starting and developing bulls, heifers, and steers, being fed longer than 150 days. This feed contains 10 mg/lb of Monensin. Feed to provide 50-480 mg/hd/day of Monensin. Feed at a rate of 1-3% of animals body weight depending on desired gain wanted and body condition of animal being fed. Good quality forage can be fed at a desired rate by feeder. Always provide plenty of fresh, clean drinking water. Clean feed troughs regularly.

Do not feed to lactating dairy cows. **CAUTION:** Do not allow horses or equines access to formulations containing Monensin. Ingestion of Monensin by equines has been fatal. (Complete Feeds) Monensin medicated cattle feed is safe for use in beef cattle feed only. Do not feed to lactating dairy cows. Consumption by unapproved species may result in toxic reactions. Do Not exceed the levels of Monensin recommended in the feeding directions, as reduced average daily gains may result.
